### A Prayer for Strength

God, I ask that you help our children to be strong and courageous as they tackle a new school year! Take from them any dread, anxiety or grief that may want to steal their joy as they embark on a new school year. Remind them daily that you are with them! You will never leave them and give them the strength they need to walk through each day. Amen.

**Have you checked your roof drains??**

Fall is just around the corner! Have you checked your commercial roof drains?

## ***We love roof restorations!!***

Metal roofs have seams, bolts, screws and ridge caps. So, when we say metal roofing is all in the details, we mean it. Our team has worked hard to provide proven specifications and materials that will restore your metal roof and extend the life of your roof for years to come!

Clogged drains prevent adequate drainage, cause roof damage and leaks. Make sure you check them before the leaves start to fall!

## **Energy Efficiency: Closed Cell Spray Polyurethane Foam Insulation**

Studies by the US Department of Energy show that 40% of a buildings energy is lost as the result of air infiltration through walls, windows and doorways. Buildings treated with spray foam insulation typically insulate as much as 50% better than traditional insulation products.

Thank you City of Belton for allowing us to be a part of this project. You are making a difference by being the difference!!
