**Ready for more daylight?**

*Summertime lovers, take heart:* we're finally heading back toward your time of the calendar. Spring and summer have the most daylight due to the Earth's position and tilt during these times. The days are longer which means more sunlight. During the summer solstice (the longest day of the year) parts of the world receive between 14 and 21 hours of sunlight!

**Planning a roof project? Get on board today! Don't wait!!**

***Now is the time to get on our schedule!!***

As with many industries, the roofing industry continues to work through material shortages and supply chain disruptions. We work hard with our manufacturers to obtain material in a reasonable time but there are things that are simply beyond our control. What we can control is getting your project on board and so we can order material far in advance. **Don't wait! CALL NOW!!!! 800-383-3062 or 913-492-1577**

# We love roof restorations!!
