### **A Thanksgiving Day Poem**

#### **Thanksgiving Day**

**Thanksgiving Day will soon be here  
It comes around but once a year**

**If I could only have my way,  
We'd have Thanksgiving every day.**

### **Leaves are falling fast! Have you checked your roof drains?**

#### **Now is the time to check those roof drains!!**

Commercial flat roofs, especially those with parapet walls, are catchalls for any and all sort of debris, including leaves, twigs, plastic bags, etc.

These roofs typically have inner roof drainage systems, which include roof drains strategically placed throughout the roof deck to quickly drain away water. Well, as the water flows towards these drains, so goes all the debris.

Drains and debris don't mix. A drain's dome lets water flow through while catching debris, which would otherwise clog the plumbing. Unfortunately, this

debris builds up around the drain dome, slowing or eventually stopping the water and setting your roof up for leaks.

## We love roof restorations!!

### Elastomeric Roof Coating Systems

- Seamless and self flashing
- Flexible to allow thermal movement
- Cost Effective
- Durable
- Lightweight
- Renewable "**Green**"
- Ask us about our polyurea basecoat
